text editor

shared folder

The image shows the configuration of a shared folder in an Ubuntu VM. The main window is the 'Edit Share' dialog box, which is open over the 'Shared Folders' settings in the Ubuntu VM's settings application. The 'Edit Share' dialog shows the following configuration:

- Folder Path: D:\shared
- Folder Name: shared
- Mount point: /mnt/shared
- ☐ Read-only
- ☒ Auto-mount
- ☒ Make Permanent

The 'Shared Folders' settings window shows a table of shared folders:

Name	Path	Access	Auto Mount	At
Machine Folders				
Transient Folders				
D:\shared		Full	Yes	

The 'User Interface' section of the settings shows the 'Visual State' set to 'Normal (window)' and the 'Mini ToolBar' options checked for 'Show in Full-screen/Seamless' and 'Show at Top of Screen'.

In the background, a file explorer window shows the contents of the 'mnt / shared' directory, which includes folders like 01-si, 02-sh, 03-jv, 04-msq, 05-hd, 06-sp, 06-zk, 07-hv, 09-hb, 10-dr, 13-af, 16-kf, 17-mgd, 18-jn, and ubbkup, along with files 'Hist231027.txt' and 'Screenshot from 2023-10-27 17-...'.

At the bottom, a terminal window shows the commands used to create the directory and mount the share:

```
sohailimran@SI:~$ sudo mkdir /mnt/shared
[sudo] password for sohailimran:
sohailimran@SI:~$ sudo mount -t vboxsf shared /mnt/shared
sohailimran@SI:~$
```
